

TEXTILE

THE COMPLETE RANGE OF SPECIAL TEXTILE

Product	Finish	Product Code	Weight (g/m ²)	Width (m)	Length (m)	Features	Printability
NAOMI - ALL-IN-ONE TEXTILES							
 FRONTLIT	matt	SN-FT230-16	230	1,60	50	high level opacity and lightweight for frames and modular structures	   
 BACKLIT		SN-BT260	260	1,60 - 3,20		unrivalled light diffusion to enhance any image on frames and display	
 BLACK BACK		SN-BB260				total block-out performance for structures, frames and pop-ups	
 FLAG		SN-FG110-16	110	1,60		long-lasting and excellent tear resistance for automotive and retail	

WHAT'S INSIDE NAOMI?

All Naomi textiles are the first to be developed with PCT resin (Polycyclohexylenedimethylene terephthalate). PCT combines excellent chemical resistance, workability and dimensional stability compared to PBT - substitute of PET - and PET itself, thanks to its higher melting point, giving a major mechanical strength at high temperatures. Naomi textiles also feature better resistance to hydrolysis - the molecular scission obtained through the action of water. Compared to weaker substrates, such as PBT and PET, **Naomi textiles with PCT offer a breaking strength increased by 20%, plus an 18° C higher temperature resistance** (internal tests).

 Printability:  Direct Sublimation  Transfer Sublimation  Eco-solvent  Latex  UV
