

Warning stickers for heavy vehicles

Information on the 2021 French legislation

Legislation in France, introduced on 1 January 2021, requires all vehicles over 3.5 tons entering French territory to display warning stickers indicating the driver's blind spots to other road users. All vehicles over this total weight, whether from the EU or other countries, must display one of these stickers. The law has been introduced to help protect vulnerable road users, especially pedestrians and cyclists, in understanding the driver position of blind spots on heavy vehicles.

This applies to both commercial vehicles and private vehicles, such as motorhomes, travelling through any 'urban environment'.

They must be applied to the vehicle (and trailer) at the following points:

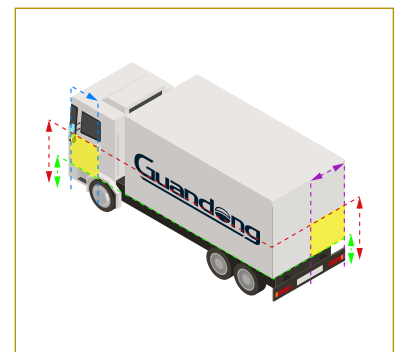

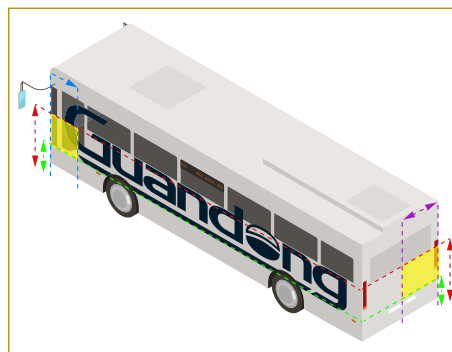

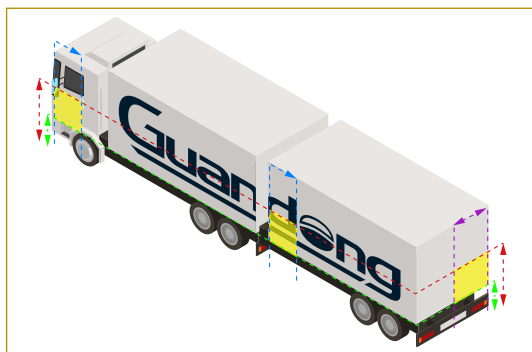

-  • minimum 900 mm above ground level
-  • maximum 1500 mm above ground level
-  • between 0m-1m of the front
-  • right-hand side of the rear

For use on all vehicle types, our revolutionary **NANO-TACAR** repositionable media is the perfect material for these signs!

6 + 1 REASONS TO LOVE NANO-TACAR

1. **Simple** to apply and remove
2. **Perfect adhesion** at high speed
3. Leaves **no residue** on the vehicle body!
4. **Applies to all smooth surfaces**
5. Leaves **no damage** on bodywork
6. **Recyclable** with plastic!

YOU CAN KEEP IT APPLIED ONLY FOR THE NECESSARY TIME

-  maximum distance above ground level
-  minimum distance above ground level
-  distance from front
-  rear right-hand side
-  area allowed for the application
